

## Questions & Answers pertaining to Dealer.com Silo Project

**Clarification of RFP Process – The deadline for proposals due February 28<sup>th</sup> shall consist of preliminary concepts intended to ‘wow’ the panel. Estimated budget, pictures of previous work, and work history are also necessary by this deadline. Dealer.com & SEABA will narrow down the received proposals. The narrowed field will then be asked to submit a more detailed concept, date to be determined in the month of March, 2013.**

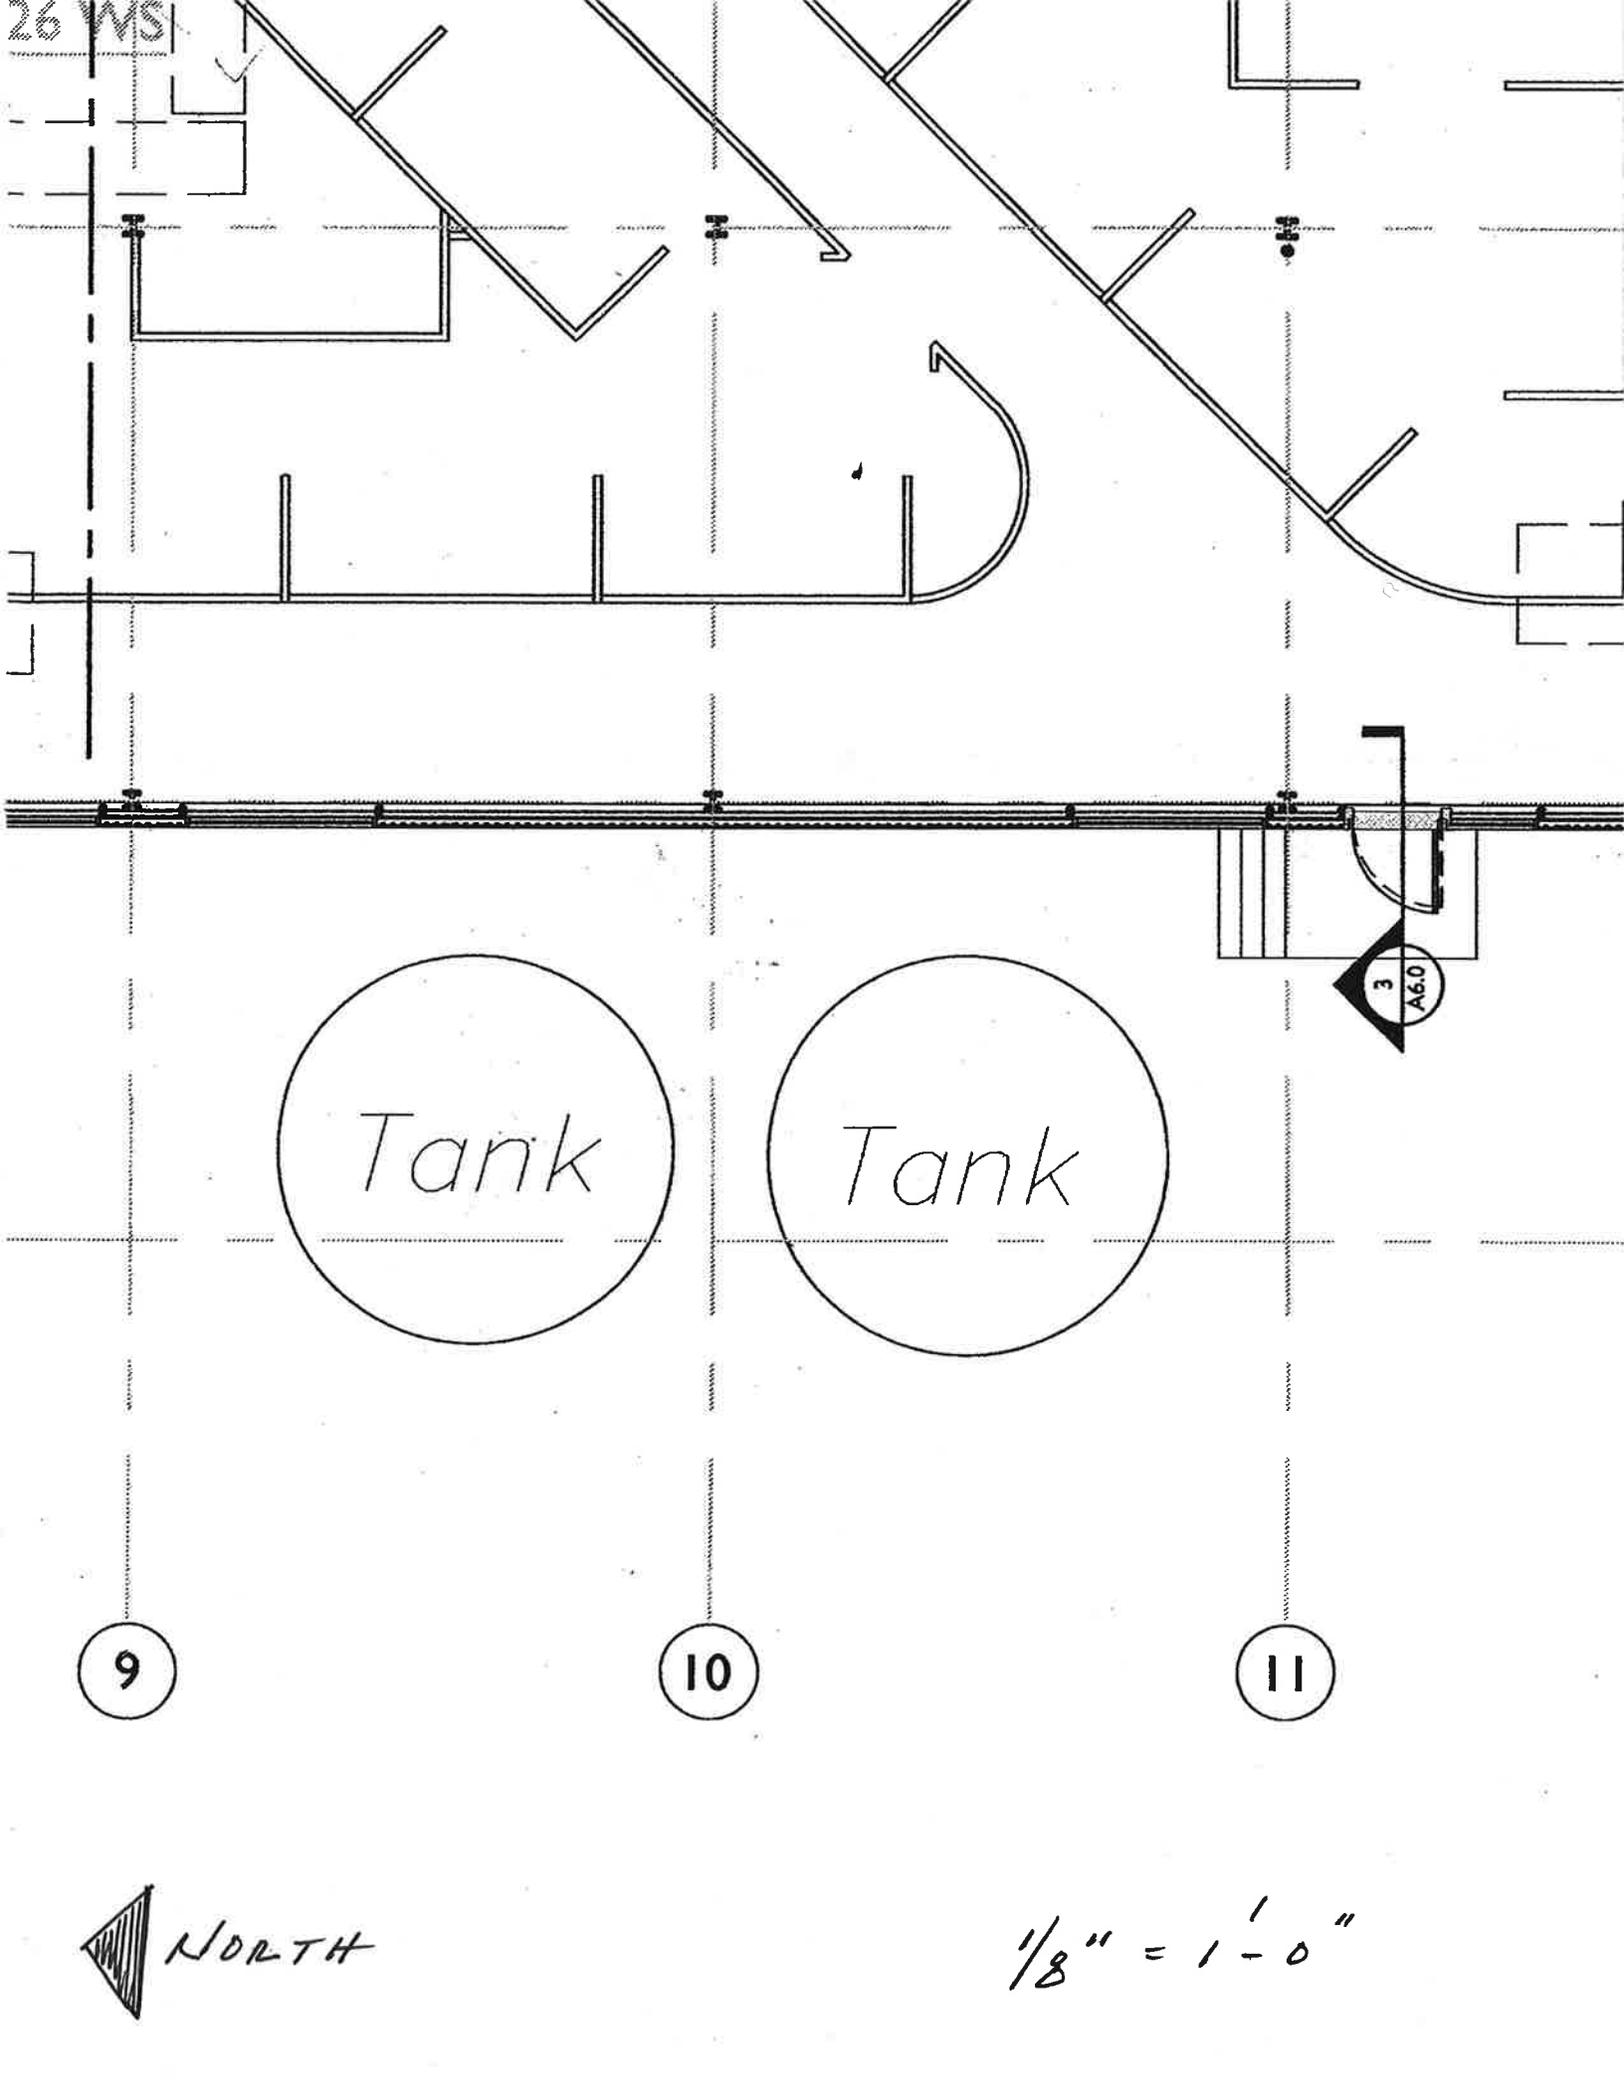

1. Are the silos used in any way currently? **No**
2. Is there a constructed connection between the silos and the building? **No**
3. Does the 32' height include the railings on top? **It does not include the railings**
4. Would dealer.com like to use the silos in any way in the future? **No**
5. Do you know what the silos were originally used for and what company built them? **Silos were originally used to store bulk plastic beads...no idea who built them**
6. Is there a chance to see the inside of the silo's? **At this time there is no way to see inside the silos as access doors have been removed and infilled.**
7. Do the silo's attach to the main building? **No**
8. Should our projected budget include maintenance & upkeep? **Yes**
9. What type of paint is currently on the structure? **A layered process including 2 base coats, a coat of primer, 2 covers of gold paint, and one topcoat faux finish. Pictures of paint used are attached, along with blueprints of silo's.**
10. Is the top rounded or flat? **The top of the silo's is a slight curved formation**
11. How far are the silo's from the Dealer.com building? **Approx. 3 feet**

12. What is beneath the silo's? **Towers are bolted to a concrete flooring, surrounded by gravel. The area surrounding the towers is acceptable for large machinery if necessary.**

13. How thick is the steel plating? **.25" thick**

14. Can the walkways and railings be removed? **Yes**

15. Plastic dust is inside the silo's (formerly Specialty Filaments storage) that may or may not be flammable, what's the procedure? **Dealer.com is getting an estimate for removal, so that interior welding & sawing can be accomplished.**
